

CXD3775AGF

Features

- **Hybrid noise canceling**
 - Feedforward/Feedback independent multi-stage filter configuration
 - Integrated 6-band equalizer path for audio line
 - Low-latency signal processing
- **High-resolution support**
 - fs to 216 kHz and 16bit to 24bit support
 - Integrated sampling-rate converter
- **Microphone input**
 - 2-channel stereo (analog and digital support)
- **Audio inputs**
 - Analog line input
 - I2S support (digital)
- **High-performance ADC: 6 channels, DAC: 2 channels**
- **Capless headphone output**
- **Integrated Cortex-M0+**
- **Support for filter adjustment using development tools**
